Course topics:

01

Introduction to the British, US or Canadian education system: An overview of the different levels of education in the chosen country, including primary, secondary, further, and higher education.

02

Academic writing skills: Writing for academic purposes requires a specific set of skills. This topic can cover areas such as essay writing, report writing, referencing, and avoiding plagiarism.

03

Research skills: Students will need to conduct research to complete their coursework and assignments. This topic can cover areas such as locating and evaluating sources, using online databases, and effective note-taking.

04

Critical thinking: Critical thinking is an important skill for academic success. This topic can cover areas such as analysing arguments, identifying assumptions, and evaluating evidence.

05

Time management and organisation: Managing time effectively is essential for academic success. This topic can cover areas such as setting priorities, creating a study schedule, and avoiding procrastination.

06

Language and culture: The language and culture of the chosen country can be different from student's origin country.. This topic can cover areas such as communication skills, cultural awareness, and adapting to a new environment.

07

Academic study skills: This topic can cover a range of skills needed for successful academic study, including note-taking, participating in seminars, giving presentations, and taking exams.

08

Personal development: Moving to a new country and studying in a new academic system can be challenging. This topic can cover areas such as building resilience, managing stress, and developing a growth mindset.
